PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience designing, developing, and deploying enterprise web applications using React.js, Node.js, Express.js, Python, and Flask. Proven expertise in building RESTful APIs, Progressive Web Apps (PWAs), and AI-powered automation solutions including OCR pipelines and OpenAI GPT-4o integrations. Skilled in the full software development lifecycle (SDLC) — requirements analysis, architecture, backend services, frontend interfaces, database design (MySQL, MongoDB), testing, and production deployment in Agile environments. Strong collaborator with hands-on experience mentoring junior developers, conducting code reviews, and leading cross-functional initiatives across product, QA, and DevOps teams.

TECHNICAL SKILLS

Frontend:

React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, jQuery, Responsive Design, Progressive Web Apps (PWA)

Backend:

Node.js, Express.js, Python, Flask, RESTful APIs, Webhooks, Microservices

AI / Automation:

Tesseract OCR, OpenAI GPT-4o, Large Language Models (LLMs), Prompt Engineering, n8n Automation, NLP, Workflow Automation

Databases:

MySQL, MongoDB

Tools & Platforms

Git, GitHub, Version Control, Postman, VS Code, Cursor, Termius, FileZilla, PuTTY, Agile/Scrum, SDLC, CI/CD basics

EXPERIENCE SUMMARY

- 2+ years of experience in full-stack web development and AI-based automation solutions.
- Delivered multiple end-to-end projects from requirements and design through development, testing, and production deployment.
- Hands-on expertise in OCR systems, document validation, REST API integration, workflow automation, and Progressive Web App development.
- Experienced in mentoring junior developers and conducting **Node.js training sessions** for new hires.
- Strong track record of delivering scalable, high-performance, production-ready web applications.

PROFESSIONAL EXPERIENCE

Executive – React & Node.js Developer

Shyam Spectra Pvt. Ltd. | May 2023 – Present

Key Responsibilities:

- Architected and upgraded enterprise full-stack web applications using React.js, Node.js, Express.js, Python, and Flask, owning end-to-end architecture, implementation, testing, and production deployment.
- Enhanced and integrated 20+ RESTful APIs for customer-facing portals, automation workflows, and internal tools, ensuring scalability, security, and maintainability.
- Built AI-powered automation modules using Tesseract OCR and OpenAI GPT-4o for document validation and photo verification, reducing manual review effort by an estimated 60%.
- Executed Progressive Web App (PWA) features including service workers, caching strategies, and offline support, improving mobile load performance and user engagement.
- Collaborated with cross-functional teams across product, QA, and DevOps to improve system scalability, code quality, and release velocity.

- Conducted Node.js training and code-review sessions for new hires, mentoring developers on REST API design and best practices.

MAJOR PROJECTS

1. Spectra One – Customer Self-Care Portal

Tech: React.js, Node.js, Express.js, MySQL, PWA

Team Size: 2 | **Status:** Ongoing

Impact & Contributions:

- Built user dashboards for payments, service requests, usage history, and account management.
- Engineered backend APIs enabling real-time data updates and service request tracking.
- Refined UI responsiveness and overall performance through optimized React components.
- Added PWA support to improve accessibility for mobile users.

2. FFA Portal – Customer Onboarding Portal

Tech: React.js, Node.js, Express.js, MySQL, PWA

Team Size: 3

Impact & Contributions:

- Architected a complete onboarding workflow including contact management, lead handling, opportunity creation, and CAF management.
- Applied modules for meeting scheduling, Wi-Fi plan sharing, negotiation workflows, and discount logic.
- Ensured high system reliability and seamless integration with backend services.

3. CAF Document Verification – Intelligent OCR System

Tech: Python, Flask, Tesseract OCR, OpenAI GPT-4o

Solo Project

Impact & Contributions:

- Built an OCR pipeline for CAF document extraction and validation.
- Integrated OpenAI GPT-4o for semantic matching, field verification, and error detection.
- Created Flask APIs to connect the OCR engine with the FFA portal.
- Reduced manual data validation effort through automation.

4. n8n Automation with MS Teams

Tech: n8n, Microsoft Teams, Power Automate, Microsoft Graph API

Team Size: 2

Impact & Contributions:

- Built a chatbot environment for sales training workflows.
- Built interactive text and voice modules to simulate customer scenarios.
- Added MS Teams integration to support team-wide practice sessions.
- Improved training efficiency and consistency across sales teams.

5. WhatsApp Flow Integration with Third-Party Portals

Tech: Node.js, REST APIs, Webhooks

Team Size: 2

Impact & Contributions:

- Developed and executed WhatsApp customer support integration with external third-party portals using Node.js.
- Built internal REST APIs to manage customer communication workflows, message triggers, and support operations.
- Established secure node-to-node connectivity between internal systems and third-party platforms for real-time communication.
- Handled API integration, webhook processing, message delivery tracking, and error handling mechanisms.
- Designed scalable backend logic for automated customer interaction and support ticket workflows.
- Coordinated with cross-functional teams and third-party providers for integration testing and deployment activities.

EDUCATION

Master of Science in Computer Applications

Swami Vivekanand Institute of Technology | 85.38 % | 2020-2022

CERTIFICATES

Cybrom Technology Pvt. Ltd., Bhopal — Full Stack Development

AWARDS & ACHIEVEMENTS

- Received Appreciation Letter for presenting an AI-powered chatbot at company-wide "AI Show and Share Day".
- Delivered multiple high-impact projects from solution design to deployment.
